New PC Clip for Lithium-Ion Batteries (17 – 19mm Dia.)

Astoria, NY...With the introduction of new Catalog No. 54, a low profile, thru-hole PC Battery Clip for Lithium-Ion size cells from 17-19mm diameters, Keystone Electronics has met increasing demands for accommodating higher energy, lower weight, rechargeable batteries placed in mobile products.

Engineered to withstand the rigorous use associated with recharging cycles in addition to shock and vibration, the clip features a 3-legged, THM design for extra strength and stability plus low profile placement into dense PC boards. This new Cat. No. 54 not only holds the 3.7 Volt rechargeable batteries, but will also accommodate the A, 2/3A, 17335, 17450, 17500, 17650, 18500 and 18650 size cells.

The design is manufactured from .012" (.30mm) thick, spring steel, with Tin Nickel plate finish. It holds battery cells firmly and securely in position and is specifically suited for higher energy, lower weight portable electronics for medical, telecommunications and industrial usage.

Availability is from stock through Keystone's global distribution network. On line ordering is accommodated.

A major producer of SMT and THM battery hardware, Keystone supplies battery and coin cell holders, clips, straps and retainers in a broad range of sizes and types along with an extensive array of electronic interconnects and hardware. In addition, application engineering services are maintained to meet special product modifications or custom designs with active stamping, machining and assembly support.

Keystone is ISO-9001:2008 certified and RoHS, REACH compliant with USA headquarters and offices in Canada, Europe, Australia and Asia. For further details and to request literature contact (800) 221-5510, or (718) 956-8900; fax (718) 956-9040; Email: kec@keyelco.com or view www.keyelco.com.
