Low Profile PCB Holders for 18650 Lithium-Ion Batteries

Astoria, NY... A new series of low profile, SMT and THM Lithium-Ion holders for 18650 batteries have been released by Keystone Electronics Corp to meet increased demands for higher energy, light weight, rechargeable batteries for new generations of electronic products.

Ruggedly built and durable, these compact holders feature low profile, heat resistant Nylon housings and Gold-plated Phosphor Bronze contacts. They are ideally suited for use with many consumer and industrial electronic products. Versatile design accommodates lead free solder and traditional reflow processes and accept all major manufacturers' of 18650 batteries.

Available in single and dual cell configurations for both THM and SMT use. See Catalog #1043 for THM - single cell applications and Catalog #1049 for THM - dual cell requirements. For SMT use, see Catalog #1042 single cell applications and Catalog #1048 dual cell requirements. Battery installation and/or removal does not require tools.

Availability is from stock through Keystone's global distribution network. Online ordering is accommodated.

A major producer of SMT and THM quality electronic products, Keystone supplies battery and coin cell holders, clips, straps and retainers in a broad range of types and sizes along with an extensive variety of interconnects and hardware. Application engineering services are maintained to meet special modifications or custom designs with active stamping, machining and assembly support.

Keystone is ISO-9001:2008 certified and RoHS, REACH compliant with USA headquarters and offices in Canada, Europe, Australia and Asia. For further details and to request literature contact (800) 221-5510, or (718) 956-8900; fax (718) 956-9040; Email: kec@keyelco.com or view www.keyelco.com.
